Rostov State Medical University
2019

ABOUT

I am a dedicated Front End Developer with a passion for scalability and a focus on collaborative problem-solving. I use my academic and freelance experience with various tools and technologies to create positive, accessible, and high-performing web experiences.

RELATED EXPERIENCE

Front End Developer [Freelance]

UpWork | Jan. 2022 - Present | Toronto, ON

- Over 90 hours of work for a client in the web 3.0 space
- Used JavaScript, React, NextJS, CSS, and Styled Components to create the front-end of an interactive WEB3 application with an NFT store
- Implemented design mockups into a fully-responsive web experience
- Collaborated in a cross-functional team with a project manager, a product designer, an asset designer, and a smart contract engineer
- Used React Spring Animation Library
- Performed regular cross-browser manual testing
- Wrote unit tests in JEST to ensure efficient and bug-free code

FEATURED PROJECTS

HANGMAN | [LIVE] [REPO]

React, SASS, RESTful API, Firebase

- Users are given 6 attempts to guess a word, one letter at a time
- Users lose points for wrong guesses and for retrieving hints
- Words generated from a 3rd-party API
- Cross-referenced to Merriam Webster Dictionary API for definitions
- Users can post their names and scores to the leaderboard hosted by the Realtime Database in Google's Firebase

NY TIMES NEWS | [LIVE] [REPO]

JSX, React, CSS, NYTimes API

- Real-time feed of NYT articles
- Users can type keywords to search for publications
- Fetched data using Axios

STICKY NOTES | [LIVE] [REPO]

JavaScript, HTML, CSS, Local storage API

- Allows users to create and save notes with daily tasks, events, etc.
- Added features: font colour palette, sketching, night mode
