ABOUT

I am a seasoned Front End Developer with a passion for scalability and a focus on collaborative problem-solving. I use my 2 years of professional experience with various tools and technologies to create positive, accessible, and high-performing web experiences.

RELATED EXPERIENCE

Front End Developer [Contract Full-Time]

Marketx Communications | Feb. 2020 - Dec. 2021 | Toronto, ON

- Collaborated with design and back-end teams to create over 20 large client projects
- Used JavaScript, React, and Next.js to build scalable web applications
- Used HTML, CSS, and JS to create over 55 responsive landing pages
- Worked with Shopify on the client-side, creating stores, apps, and customizing Shopify themes with Shopify CLI
- Pair programmed with 2 other developers to review team's code, provide feedback and catch missed errors
- Optimized 10+ applications for maximum speed and scalability
- Wrote unit tests in JEST to ensure efficient and bug-free code

PERSONAL PROJECTS

HANGMAN | [LIVE] [REPO]

React, SASS, RESTful API, Firebase

- Users are given 6 attempts to guess a word, one letter at a time
- Users lose points for wrong guesses and for retrieving hints
- Words generated from a 3rd-party API
- Cross-referenced to Merriam Webster Dictionary API for definitions
- Users can post their names and scores to the leaderboard hosted by the Realtime Database in Google's Firebase

NY TIMES NEWS | [LIVE] [REPO]

JSX, React, CSS, NYTimes API

- Real-time feed of NYT articles
- Users can type keywords to search for publications
- Fetched data using Axios

STICKY NOTES | [LIVE] [REPO]

JavaScript, HTML, CSS, Local storage API

- Allows users to create and save notes with daily tasks, events, etc.
- Added features: font colour palette, sketching, night mode
